Abstract. This is my abstract.
1 Introduction

This is my introduction. Shaw [2] wrote a paper with hints on how to write good software engineering research papers. By the way, this was an example for using the *biblatex* command \textcite{}.

Section 2 presents everything one must know. The conclusions follow in Section 3.

2 Another Section

AspectJ can be used to weave cross-cutting concerns into Java programs [1]. By the way, this was an example for using the *biblatex* command \cite{}.

We will now demonstrate how to use subfigures (see Figure 1). Figure 1a shows a circle. A star is displayed in Figure 1b.

(a) left figure.

(b) right figure.

Fig. 1: A circle (a) and a star (b). Note that any caption ends with a full stop character.

3 Conclusions

These are my conclusions.
